Dian Masalanta: Realtime Disaster-aware Navigation

Ctrl Freaks (Philippines)
“We will deny the fact and we will not insist that all places have received [aid] because there are really areas that have not yet received any. What we are saying is we need help in reaching all these that have not yet been reached,” he said.

“I would like to give you a date and a time if possible, but that is not within the national government’s control how effectively we can hit the ground. There are places which are very remote, which we need to know also, so that we can reach them,” he said.
Utilizing GNSS and IoT for disaster monitoring
