

MINISTRY OF TRANSPORTATION

REPUBLIC OF INDONESIA

STATEMENT – SAFE AND INCLUSIVE TRANSPORT AND MOBILITY

(AGENDA ITEM 3.C.)

AT

ECONOMIC AND SOCIAL COMMISSION FOR ASIA AND THE PACIFIC

7TH SESSION OF THE COMMITTEE ON TRANSPORT

23-25 NOVEMBER 2022

Honorable Chair,
Excellencies,
Distinguish Delegates,
Ladies and Gentlemen,

Indonesia put its utmost commitment to developing standards and regulations to build safe and inclusive transport and mobility.

To improve safety on road transport and mobility, the Government of the Republic of Indonesia has implemented the Public Transport Company Safety Management System which is a comprehensive and coordinated management of a company's safety management in order to embody safety and manage accident risk.

The Government of the Republic of Indonesia conducts the Motorized Vehicle Periodic Tests to provide technical safety guarantees for the use of motorized vehicles.

Indonesia also conducts public safety campaign and builds educational parks for the younger generation to raise the awareness of the road safety.

In order to optimize the development of transportation facilities and infrastructure that could be accessed by everyone, the Government of the Republic of Indonesia has developed Minimum Service Standards for the transportation sector which are regulated in Ministerial Regulation concerning the Provision of Accessibility to Public Transportation Services for Users of Transportation Services. The regulation obligates public transportation service providers to provide services for transportation users with special needs.

The Government of the Republic of Indonesia has also established Gender Responsive Planning and Budgeting regulation and related documents which are the Gender Analysis Pathway (GAP) and Gender Budget Statement (GBS).

Indonesia believed that the cooperation in Asia and the Pacific region can be carried out through knowledge sharing and benchmarking of concepts and systems in realizing an inclusive transportation system in a real and comprehensive manner.

Therefore, Indonesia supports the Regional Plan of Action for Asia and the Pacific for the Second Decade of Action for Road Safety to be adopted to provide as a framework for stronger and a more comprehensive cooperation among the member states.

Indonesia stands ready to work together with all member states in realizing a safe and inclusive transport system and connectivity in Asia and the Pacific.

I thank you.
