Transport Evidence Base Strategy (TEBS): Connecting our evidence base with transport policy

22 September 2021
Steve Riley, Senior Adviser – Domain Strategy
New Zealand Ministry of Transport
Who are we?

The Ministry of Transport

Transport Crown Entities

Transport State Owned Enterprises
Transport Outcomes Framework

**Inclusive access**
Enabling all people to participate in society through access to social and economic opportunities, such as work, education, and healthcare.

**Healthy and safe people**
Protecting people from transport-related injuries and harmful pollution, and making active travel an attractive option.

**Economic prosperity**
Supporting economic activity via local, regional, and international connections, with efficient movements of people and products.

**Environmental sustainability**
Transitioning to net zero carbon emissions, and maintaining or improving biodiversity, water quality, and air quality.

**Resilience and security**
Minimising and managing the risks from natural and human-made hazards, anticipating and adapting to emerging threats, and recovering effectively from disruptive events.
The Transport Evidence Base Strategy

Government’s Overall Goal

Transport Sector Outcomes

Transport Evidence Base

Domain Plan
- Ensures the right data, statistics and information are available

Research Strategy
- Creates a research environment to maximise the benefits from transport-related research

Evaluation Strategy
- Provides a framework for evaluating transport system performance, regulation, policy and investment

Information Strategy & Architecture
- Provides a common framework and architecture for collection, management and sharing of transport data and information

Modelling Strategy
- Provides a framework for analysis and modelling of transport system performance, regulation, policy and investment

Te Kāwanatanga o Aotearoa
New Zealand Government
Transport Evidence Base Strategy

- TEBS ensures the transport sector has a:
  - Shared understanding of:
    - the ‘enduring questions’ and future challenges
    - associated data and research gaps
    - agreed framework for prioritising and investing in knowledge gaps
  - Framework for the recognition of Māori values
  - Common approach for evaluation of transport policies, regulations, interventions and processes
  - Set of actions required to support generation and use of the transport evidence base for decision making

Transport Knowledge Hub

Community of interest to promote the sharing transport data, evidence, knowledge, research, information, capabilities, and ideas

https://www.transport.govt.nz/mot-resources/transport-knowledge-hub/
TEBS Enablers

- **Improve access**: Ensure data, research and evaluation findings are discoverable, accessible and reusable.
- **Improve governance**: Ensure sharing, integration, and governance of key data and information products.
- **Invest in the right activities**: Ensure we invest in the right activities and projects.
- **Facilitate Collaboration**: Foster cross-agency collaboration and relationships with the wider transport sector.
- **Develop capacity and capability**: Ensure that the sector has access to the right skills and knowledge.
Spotlight on ‘Improving Access’

Data, research and evaluation findings are discoverable, accessible and reusable

Spotlight on ‘Developing capacity and capability’

Ensure the sector has access to the right skills and knowledge
