Chulalongkorn University

Digital innovation is the important tool to prepare for an ageing society, establish equality, and achieve the 2030 Agenda for Sustainable Development.

The Side Event “Shaping Sustainable Ageing Through Digital Innovation in Asia-Pacific Countries”

will give opportunities to the Asia-Pacific countries to share methods, best practices, and lessons in promoting digital innovation to prepare for challenges of the demographic transition, to develop understanding, and exchange opinions on the connection between achieving Sustainable Development Goals and the roles of digital technology in the context of an aged society in the region.
