

Korea's Implementation of the Sustainable Development Goals (SDGs)

Feb. 6, 2023

Junwoo Jeon

Director, Statistics in Policy Research Team

Statistics Research Institute

(Youngshil Park, Minhee Yoon, and Jieun Jeong)

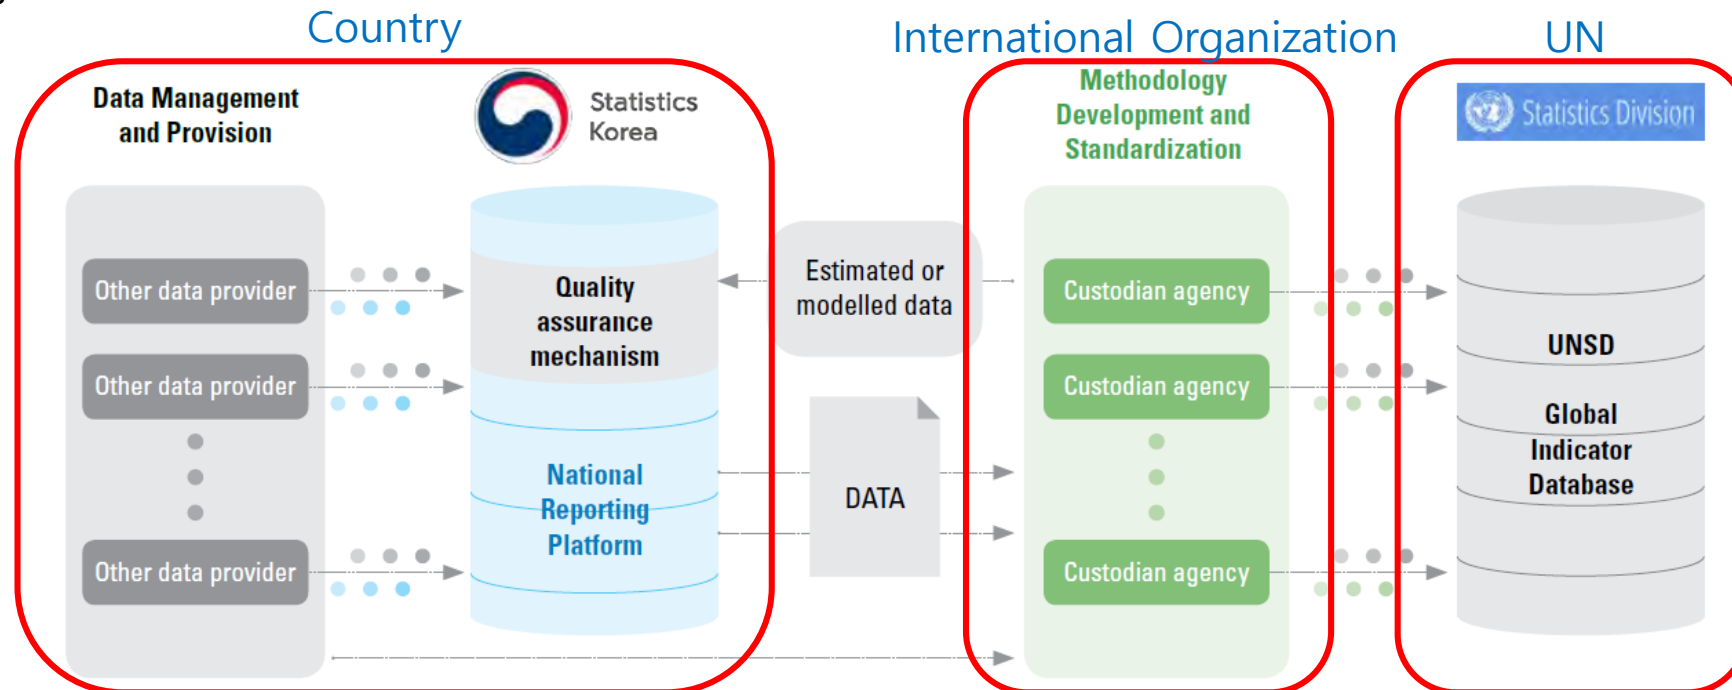

I. Overview

- In Sep. 2015, the UN General Assembly adopted the 2030 Sustainable Development Agenda to spur UN member states including the Republic of Korea to stride towards the Sustainable Development Goals (SDGs)
 - ✓ SDGs comprise 17 Goals and 169 Targets in the economy, society and environment fields, and their progress is measured through 231 Global Indicators
- In line with the need for UN member states to share their progress towards the SDGs, the Korean government has been **monitoring the country's implementation of the SDGs with KOSTAT playing a central role**
 - ✓ **Providing country-level, quality data** is key to the successful implementation of the SDGs
 - ✓ Korean government is fully committed to providing high-quality data with a focus on official statistics
 - Has published comprehensive analysis reports since 2019 to review the nation's progress towards the SDGs
 - Leverages domestic statistics corresponding to global SDG indicators through progress reports to assess country-level progress and ensure comparability to other OECD countries

Provision of SDG data and Korea's governance system

- **(Provision of data to international organizations)** Korea provides data and metadata **prepared in accordance with the Fundamental Principles of Official Statistics** to international organizations at their request
 - International organizations **submit such data to the UN database following comparability review**
 - In case differences occur as international organizations do not use the data and methodologies provided by respective countries, these organizations account for such inconsistencies to NSOs and data providers
- **(Domestic governance) KOSTAT** was designated as a **data focal point**
 - Provides data based on Korea's official statistics and data in collaboration with 28 government ministries and nearly 40 statistical producers

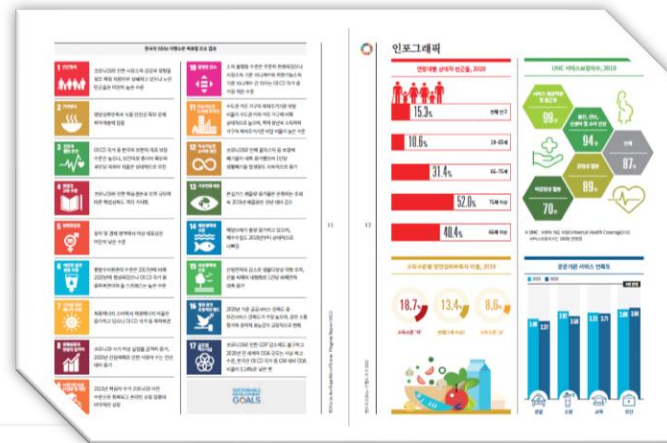

Framework Act on Sustainable Development and KOSTAT's role

- Recent enforcement of the Framework Act on Sustainable Development (Jul. 5, 2022) laid the legal groundwork for KOSTAT's mandate in relation to the SDGs
 - Efforts have been made since 2017 to amend relevant laws, and new provisions were established recently in collaboration with the Office for Government Policy Coordination and the Ministry of Environment

| Act | | Framework Act on Sustainable Development (took effect in Jul. 2022) | Act on Sustainable Development (abolished) |
|------------------------------|------------------------------------|---|--|
| Line Ministry | | ✓ Office for Government Policy Coordination | ✓ Ministry of Environment |
| Key Details | Implementation Strategy | ✓ Establish and implement action plans every five years to formulate and execute 20-year national/local basic strategies for sustainable development | ✓ Based on higher laws (Establish and implement 20-year National Basic Plans for Sustainable Development every five years based on the Carbon Neutrality Green Growth Framework Act) |
| | Indicator Development & Evaluation | ✓ Develop and distribute national/local-level sustainable development indicators , and conduct biennial sustainability assessments | ✓ Government prepares and distributes sustainable development indicators and conducts biennial national sustainability assessments |
| Provisions Concerning KOSTAT | | ✓ Heads of central administrative bodies shall consult Commissioner of KOSTAT in advance in developing and distributing indicators (Article 10 of the Enforcement Ordinance) ✓ Commissioner of KOSTAT shall join the Presidential Commission on Sustainable Development as an ex-officio member (Article 13 of the Enforcement Ordinance) | ✓ Not available (Heads of central administrative bodies prepare indicators through deliberations made through the Presidential Commission on Sustainable development) |

KOSTAT's monitoring of progress towards the SDGs

- Review Korea's progress towards the SDGs based on global indicator data
- Publicly available database based on an open source platform
- R&D on the standardization and improvement of indicators to ensure the availability of SDG data

II. SDGs in the Republic of Korea: Progress Report 2022

- Progress Report 2021 focused on ‘vulnerability’ issues that could occur in the economy, society and environment fields amid COVID-19
- **Progress Report 2022** not only captures vulnerable areas and groups but also **dives into how Korean society fared in the post COVID-19 era to shed light on the responses made by Korea to the global pandemic**
 - ✓ **Reviewed official statistics and data availability** to collect and manage data for each indicator
 - Identified and organized data sources, responsible organizations and disaggregation levels
 - Secured fit-for-purpose statistics that best reflect Korea’s progress status when data was found to have limitations or its sources were not clear in the process of analyzing selected indicators
 - ✓ Organized the report around selected global SDG indicators **in each of the 17 Goals**
- 17 Goals were further categorized into **5Ps – People, Planet, Prosperity, Peace and Partnership** – to review Korea’s progress through a total of 231 indicators
 - ✓ Analysis data : Data from the UN DB + domestic official statistics and policy data

Korea's goal-by-goal status in achieving the SDGs

1 NO POVERTY
Significant market income loss caused by COVID-19 was offset by government financial support, but the poverty rate of the elderly is still very high.

2 ZERO HUNGER
Vulnerable groups are disproportionately affected by poor nourishment and food insecurity.

3 GOOD HEALTH AND WELL-BEING
Korea has a high UHC level among OECD countries, but it needs to reduce catastrophic health expenditure and increase the number of healthcare workers.

4 QUALITY EDUCATION
Korea is witnessing a significant learning deficit caused by COVID-19 and widening gaps in academic achievement between urban and rural.

5 GENDER EQUALITY
Women remain underrepresented in the economical and political fields.

6 CLEAN WATER AND SANITATION
Korea achieved a higher IWRM score in 2020 than it did in 2017, but it is still among the middle-to-low score groups in OECD, and water stress level is high.

7 AFFORDABLE AND CLEAN ENERGY
The share of renewables in final energy consumption is increasing, but it is among the lowest levels in OECD.

8 DECENT WORK AND ECONOMIC GROWTH
A lot of women lost their jobs amid COVID-19, and deaths from industrial accidents increased from 2019 to 2020.

9 INDUSTRY, INNOVATION AND INFRASTRUCTURE
The number of jobs almost returned to pre-pandemic levels in 2021, and online shopping transactions have grown dramatically.

10 REDUCED INEQUALITIES
Income inequality is on a steady decline, but the gaps between Gini coefficients based on market income and on disposable income are the smallest among OECD countries.

11 SUSTAINABLE CITIES AND COMMUNITIES
Those living in the capital area are more likely to live under the minimum residential standards than their counterparts living in other regions, especially the youth and low-income groups.

12 RESPONSIBLE CONSUMPTION AND PRODUCTION
Packaging waste, including plastic, has increased significantly due to COVID-19, and domestic waste generation per capita is also on the rise.

13 CLIMATE ACTION
Emissions decreased in 2019 from the previous year with the overall trend of GHG emission growth slowing down.

14 LIFE BELOW WATER
Total amount of marine debris has increased and the quality of seawater has relatively deteriorated since 2018.

15 LIFE ON LAND
Forest loss is putting biodiversity at risk, and the size of affected areas by wildfires has significantly increased per case as they are becoming larger.

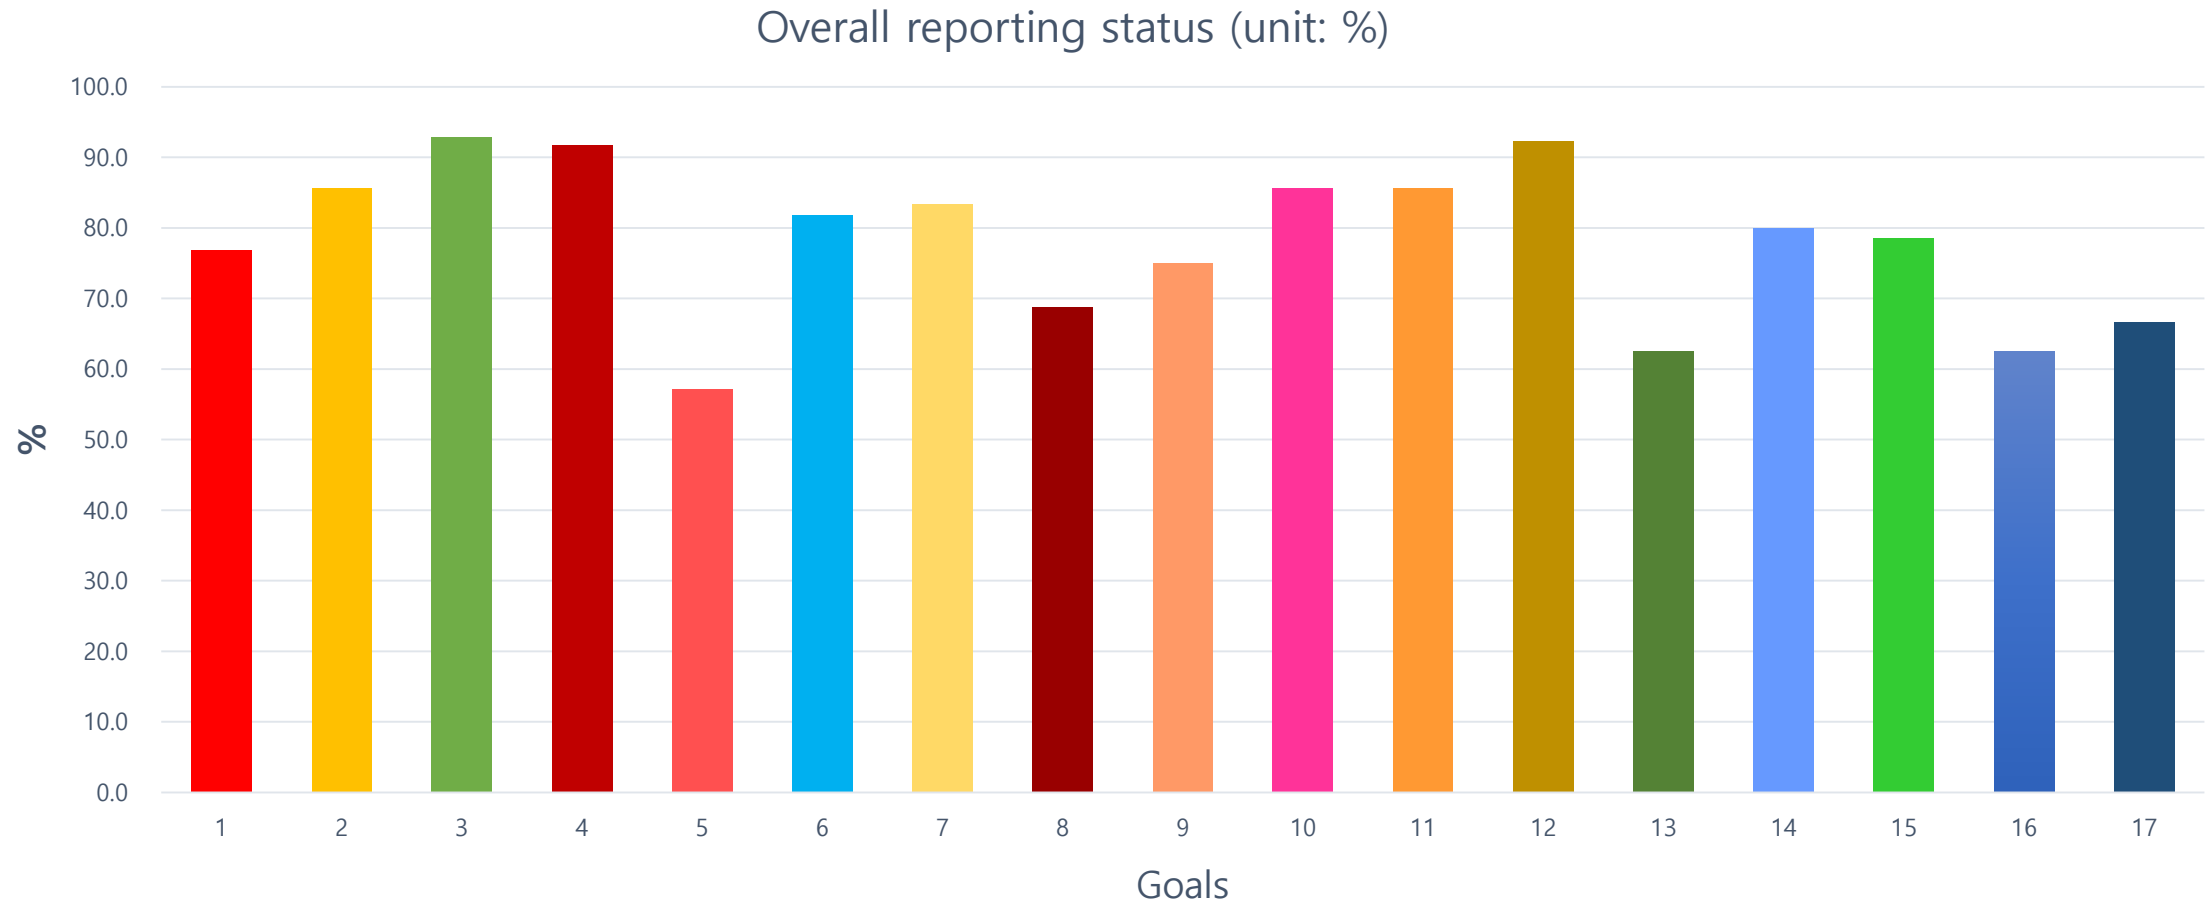

16 PEACE AND JUSTICE
Health service earned the highest score in a survey on satisfaction with public services, and both the state-public communication and political efficacy were improved.

17 PARTNERSHIPS FOR THE GOALS
Despite the GDP loss due to COVID-19, global ODA reached an all-time high in 2020, but ODA as a percentage of GNI is quite low at 0.14% in Korea compared to other OECD countries.

SUSTAINABLE
DEVELOPMENT
GOALS

Korea's overall status in reporting the SDGs

4 Quality education

People

- ◆ (Goal 4) Percentage of middle school seniors and high school sophomores **below basic academic skills rose** in 2020 from that of 2019, **confirming concerns about learning loss**
- ✓ Notably, **percentage of students below basic academic skills in English** increased by **3.8%p** among middle school seniors (3.3%(2019)→7.1%(2020)), and by **5.0%p** among high school sophomores (3.6%(2019)→ 8.6%(2020))
- ✓ By regional size, percentage of **middle school seniors** below basic academic skills in **math** was higher in **rural areas (18.5%)** than in **large cities (11.2%)**, and the **regional disparity** widened to **7.3%p**, up from the previous year (4.9%p)

The percentage of students below basic academic skills(Level 1); 2019, 2020

(Unit: %)

Source: Ministry of Education, Result of 2020 National Assessment of Educational Achievement and Response Strategies to Strengthen Learning Support, Press Release(June 1, 2021), p.2. <Table> was used to draw the graph.

Note 1: Achievement by subject is divided into four levels (Level 4: Excellent, Level 3: Average, Level 2: Basic, Level 1: Below Basic Academic Skills).

Note 2: There is no data that directly compares different countries in the impacts of COVID-19 on academic achievement. Some countries, such as the United States, Germany and Japan, did not conduct their national assessment of educational achievement in 2020 due to concerns about the spread of COVID-19.

The percentage of students below basic academic skills(Level 1) by regional size; 2019, 2020

(Unit: %)

Source: Korea Institute for Curriculum and Evaluation, Result Reports of 2019 and 2020 National Assessment of Educational Achievement were used to draw the graph. For details, please refer to Min-hee Seo, Wan-su Kim, Mi-rim Kim, Jeong-ah Han, Yun-hee Son(2020a: 32, 2020b: 33) and Nam-ok Koo, Mi-rim Kim, So-ra Lee, Min-ho Kwak(2021a: 32, 2021b: 33).

5 Gender equality

People

◆(Goal 5) **Female manager rate** was 15.4% in 2019 (15.7% in 2020), and **female share of seats in parliaments** was 19.0% in 2021 to account for roughly 1/5 of total, placing Korea in the lower ranks among OECD countries

Female manager rate of OECD countries; 2019

(Units: %)

Source: UNSD, 2019 Economically active population survey by country
Note : Israel is based on 2017 and Australia is based on 2018

Female share of seats in national parliaments of OECD countries; 2021

(Units: %)

Source: IPU(Inter-Parliamentary Union), Parline Database, retrieved on June, 2021)

7 Affordable and clean energy

Prosperity

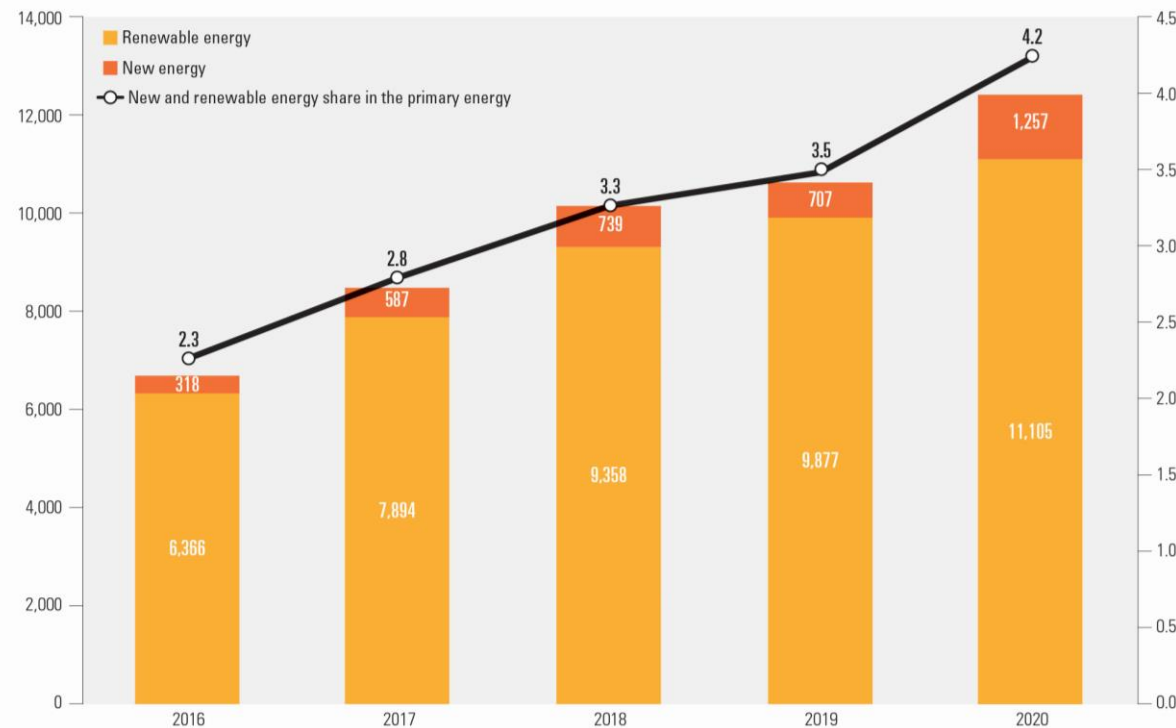

◆ (Goal 7) Korea has been committed to raising the share of renewable energy, and as a result, its growth has been further accelerated recently

- Korea is simultaneously promoting both new energy sources - hydrogen and fuel cells - and renewable energy sources - solar energy, wind power, and bio (still behind other OECD countries)

Production of new and renewable energy and their shares in the primary energy; 2016~2020

(Unit: 1,000toe, %)

Source: Korea Energy Economics Institute, New & Renewable Energy Supply Statistics, each year

Note: Non-renewable waste was excluded from the renewable energy category in 2019 as the revised New and Renewable Energy Act took effect in October 2019. The energy was also removed from 2015~2018 data in the graph to make the figures comparable to the 2019 one. That made the numbers for the previous four years look different even though the same source as last year's report was used.

The percentage of renewable energy in final energy consumption of OECD countries; 2018

(Unit: %)

Source: Worldbank, World Development Indicators, Renewable energy consumption(% of total final energy consumption)<https://databank.worldbank.org/source/world-development-indicators>, retrieved on November 10, 2021)

9 Industry, innovation and infrastructure Prosperity

◆ (Goal 9) Demand for online transactions surged following COVID-19, and total online shopping transaction amounts reached nearly KRW 48.2573 trillion in Q3 2021, up by 19.7% year-on-year

- Transaction amount varies by product category (Travel & transportation ▼, Culture & leisure ▼, F&B ▲
Home appliances, electronics, communication devices ▲)

Trend of online shopping transaction amount by category; 2017~2021

(Unit: KRW million)

Source : Statistics Korea, Online Shopping Trend Survey(https://kosis.kr/statHtml/statHtml.do?orgId=101&tblId=DT_1KE10041&conn_path=l3, retrieved on January 7, 2022)

Note : Only some of the 23 categories are used.

14 Life below water

Planet

- ◆(Goal14) Seawater quality remained good overall for the recent 5 years, but the proportion of Bad grades **rose to 4.5% in 2020** from 1.9% in 2016

The share of seawater quality grades; 2016~2020

(Unit: %)

Source: Ministry of Oceans and Fisheries & Korea Marine Environment Management Corporation, 2019 Annual Report on the Korean Marine Environment

Note : Considering the characteristics of the marine environment for each sea area, scores are calculated based on substances causing eutrophication(dissolved inorganic nitrogen concentration in the surface layer, dissolved inorganic phosphorus concentration), primary reactant(chlorophyll a, transparency) and secondary reactant(dissolved oxygen saturation in the low layer) and different grades are given[grade 1(very good), grade 2(good), grade 3(normal), grade 4(bad), grade 5(very bad)].

15 Life on land

Planet

◆ (Goal 15) Between 2010 and 2020, Korea witnessed an **annual average rate of 0.16% in decline in forestry**, joining the group of 10 **countries*** which experienced such a **downward trend** out of 38 OECD countries

* Countries on a downward trend (↓): Israel(0.91%), Columbia(0.27%), Mexico(0.19%), Netherlands(0.09%), Slovenia(0.07%), etc.

** Countries on an upward trend (↑): Iceland(1.42%), Chile(0.89%), Ireland(0.86%), Denmark(0.71%), Italy(0.60%), etc.

✓ **Areas damaged by forest fires** in Korea amounted to 429.6ha between 2010 and 2014, and to **1,557.5ha between 2015 and 2020** on an annual average basis, with affected areas becoming increasingly larger in size

<Areas Affected by Forest Fires (2010~2020)>

Source: Korea Forest Service, Forest fire occurrence

17 Partnerships for the goals

- ◆ (Goal 17) Korea's **ODA (Official Development Assistance)** in 2020 stood at **0.14%** as a percentage of **GNI** (Gross National Income), **down by 0.01%p** from the previous year (0.15%)
- ✓ With the total average of 0.32% of 29 OECD DAC (Development Assistance Committee) members, Korea is ranked **27th**, on par with Poland (0.14%), Slovakia (0.14%), and the Czech Republic (0.13%)

ODA/GNI ratio of OECD DAC Members(based on expenditure); 2020

(Unit: %)

Source: Wilcks, J., N. Pelechà Aigües and E. Bosch (2021), "Development co-operation funding: Highlights from the complete and final 2019 ODA statistics", in Development Co-operation Profiles, OECD Publishing, Paris(https://www.oecd-ilibrary.org/sites/401f9a42-en/index.html?itemId=/content/component/5e331623-en&_csp_=b14d4f60505d057b456dd1730d8fcea3&itemIGO=oecd&itemContentType=chapter&_ga=2.197826223.1279694035.1628080677-192542855.1608730099, retrieved on November 12, 2021)

Note : Out of the total DAC 30 member states, 29 countries were analyzed, excluding the EU.

Progress outcomes in summary

- While the ramifications of COVID-19 became more visible, this came in tandem with the government's policy interventions, market responses, and nation-wide cooperation and participation, painting a mixed picture of hope and despair
 - ✓ Impact becoming visible across all areas – economy, society, environment, and international cooperation
 - ✓ Economic difficulties leading to deteriorating residential conditions
 - ✓ Dramatic surge in the generation of plastic packaging waste and per-capita domestic waste
 - ✓ Reduction in ODA due to cross-border travel restrictions
 - ✓ Negative impact disproportionally affecting socially vulnerable groups
 - High poverty rate among the elderly and high employment rate among youth and women
 - Housing conditions further aggravating among youth households and low-income households
 - ✓ Increase in governmental financial support assisting households to make their ends meet
 - Inequality measured by the Gini coefficient is improving
 - ✓ High vaccination rate achieved through the government's disease control efforts and the public's cooperation
 - Robust and resilient healthcare system functioning properly
 - ✓ Number of employed people, which had declined, returning to pre-pandemic levels
 - ✓ Rapid growth in online shopping transactions
 - ✓ Steady increase in the proportion of eco-friendly, renewable energy
 - ✓ Continued efforts for international aid through ODA undertakings
 - Establishing leadership as an aid donor in the international society

Progress outcomes in summary *(continued)*

- Analysis outcomes available to date demonstrate that while **Korean society is making progress towards sustainable development** in alignment with the fundamental spirit of the SDGs,
- **Korea** needs to tackle the challenges of **inequality, poverty, and discrimination**
 - ✓ There remain disparities by gender, class and region as well as poverty among specific social groups
 - ✓ There are numerous improvements to be made in preserving the environment for future generations
 - ✓ There still exists discrimination against immigrant workers, female marriage migrants, and undocumented foreigners

III. Korea's SDG data platform

- Built based on open source (Apr. 2021) → Expanded English services (Sep. 2021)
- Provide a wide range of Korean data that correspond to the UN SDGs

⇒ Domestic data available for 179 indicators out of 231 indicators
(77% availability)

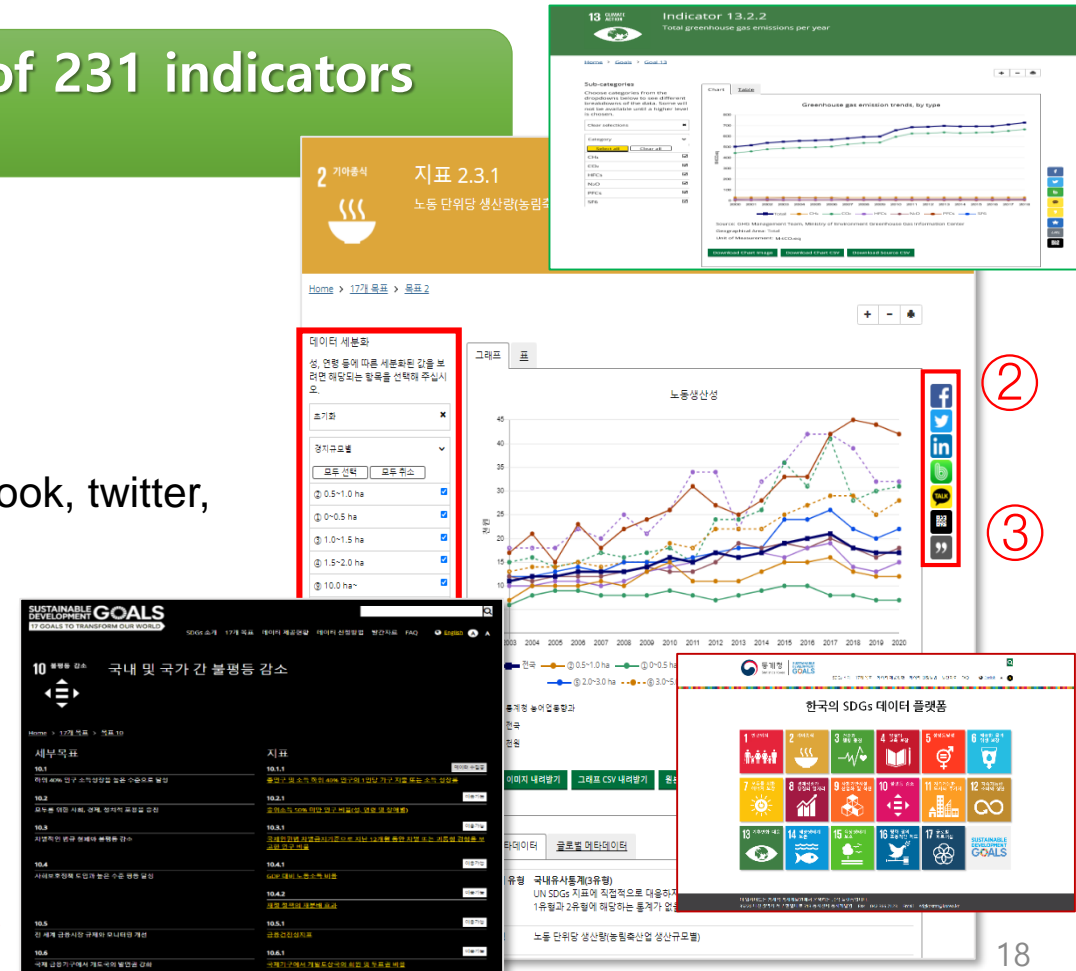

✓ Visualize disaggregated data by key feature

✓ Pursue inclusiveness and user convenience

- ① Screen for low-vision users
- ② Sharable through social network channels (facebook, twitter, Kakao, etc.)
- ③ Indicator-specific QR codes and quotations

✓ Average monthly visitor: Nearly 1,200 persons
✓ Domestic-overseas visitor ratio → 80 : 20 (%)

<https://kostat.go.kr/sdg>

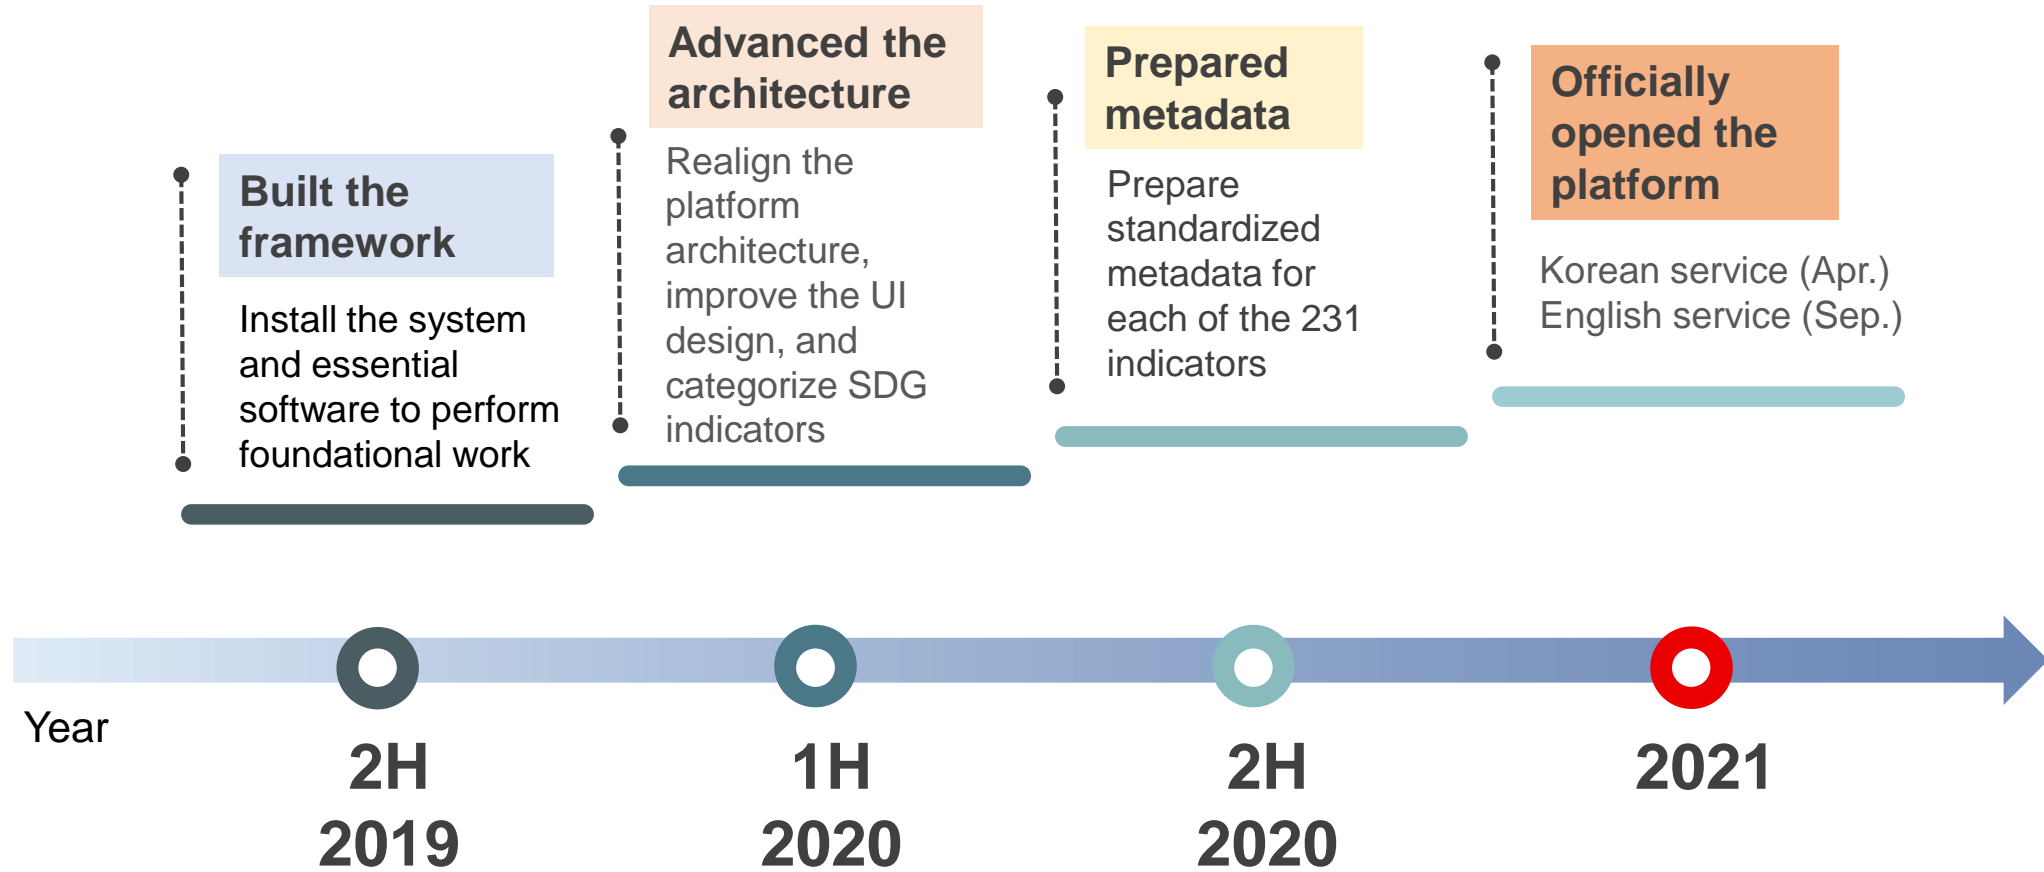

Key features of Korea's SDG data platform

- **(Open data)** Open data and content can be freely used, edited, and shared for any purpose
- **(Disaggregated data)** Access is made available for disaggregated data to encourage interest in diverse groups, including vulnerable ones
- **(Metadata)** Basic information is provided for each indicator, including definition, preparation methodology and cycle, and data source
- **(Multilingual & accessible service)** Accessibility is ensured for users with disabilities, and mobile and other various access devices are supported
 - Enable high-contrast, inverted color functionality for low-vision users as well as English language service
- **(Standardized interface)** Standardized APIs enable global-level/international data generation and sharing

Phased-in development of the data platform

1st SDG Data Innovation Forum

- Take the viewpoint of data in sharing the status of Korea's progress towards the SDGs and discussing policy directions with a range of stakeholder groups (1st forum hosted this year, to be held annually)
 - May 25, 2022 (Wed.) 09:30~17:00, International conference room, Statistics Center in Daejeon (hosted in hybrid (on/offline) format)
 - Theme: Korea's status of progress towards the SDGs, data disaggregation, data innovation, etc.
 - ✓ Explore new data access methods, study cases of developing SDG indicators by using data from diverse sources

2022

The 1st SDG Data Innovation Forum

| Korea's SDGs Progress and Response After COVID 19 Outbreak

May 25, 2022 (Wed.) 9:30~16:30

|Venue| International Conference Room F1,
Statistics Center, Daejeon
YouTube Streaming (sign language interpretation)

세션 1

한국의 SDGs 이행현황 2022

「한국의 SDGs 이행보고서 2022」의 주요결과를 소개하고, 향후 국내 SDGs 정책 방향을 논의합니다.

세션 2

데이터 세분화와 포용정책

SDGs의 핵심과제인 '아무도 뒤처지지 않게 한다(Leave No One Behind)'는 포용성 원칙의 관점에서 취약집단의 현황을 분석하고 지원 정책을 위한 데이터 세분화 방안을 논의합니다.

세션 3

데이터 혁신과 가치창출

SDGs 지표 개발을 위한 새로운 데이터 접근방법을 탐색하고 다양한 출처의 자료를 활용한 SDGs 지표 생산 사례를 통해 앞으로 나아가야 할 방향을 제시합니다.

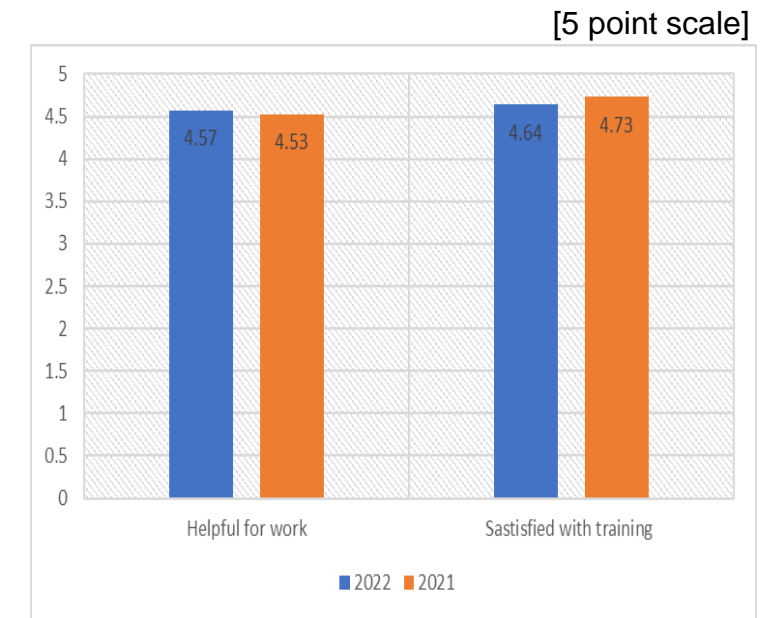

Statistics Research
Institute

Training course provided to government officials and the public

➡ Training program : “Understanding SDGs”

- Opened the training course in 2021, 2022
- 2-day course: Concepts, Global and domestic trends, Indicator framework, Policy evaluation cases

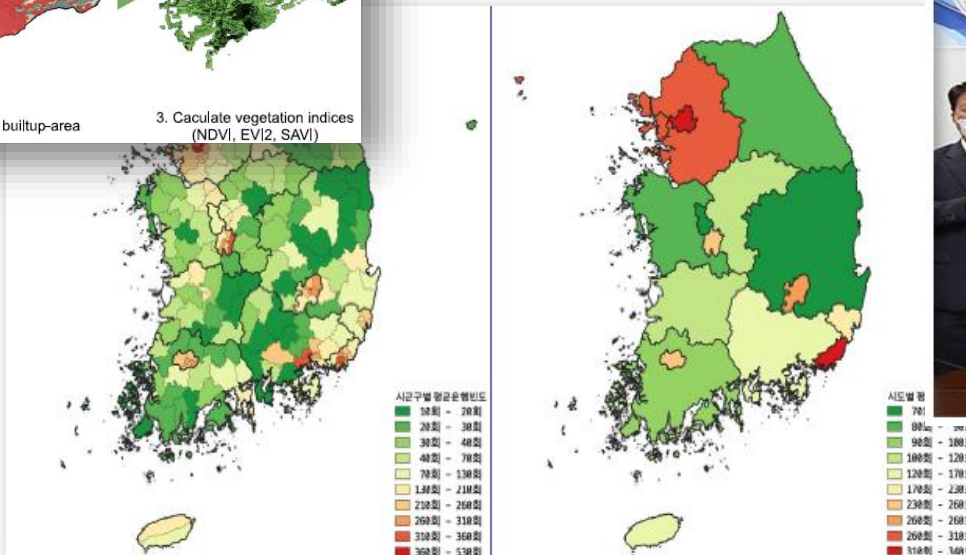

V. Challenges in progressing towards the SDGs

- Secure **fit-for-purpose statistics** that best reflect Korea's status of progress 
- Bolster the SDG **data network** in and outside of Korea 
- Broaden **opportunities for discussion and cooperation** between data producers and users 
- Research and develop new, innovative **data access methods** 

R&D on innovative data access methods

- ➔ KOSTAT is **exploring unofficial data sources** and **integrating them with survey and census data** in developing SDG indicators
 - Use of geospatial information (SDG 9.1.1 / 11.1.1 / 11.2.1 / 11.3.1)
- ➔ Also, KOSTAT is working to apply machine learning techniques to produce more timely and reliable statistical data
 - Signed an MOU with IBS (National Institute for Basic Science)
