# Population and Housing Census of the Kyrgyz Republic 2022.

- Through electronic surveys using personal mobile phones of enumerators.
- Conducted in 2 stages:
  - ✓ During the period from March 25th to April 3rd, 2022
  - ✓ In certain areas of the republic, the census was conducted from April 23rd to May 2nd, 2022
- Approximately 28,000 census enumerators were involved.
- The population is enumerated based on their usual place of residence.
- The census included the enumeration of citizens of the Kyrgyz Republic, foreign citizens, and stateless individuals who were permanently or usually residing or temporarily present on the territory of the Kyrgyz Republic, as well as those temporarily absent at the time of the population count.

  - Female - 973 310
- Marriages – 356 953
- Divorces – 83 832
- Deaths
  - Male - 135 503
  - Female - 108 767
- Adoption - 5 062
- Establishment - 136 473
- Change of name – 217 554

# Problems

- **The Law of the Kyrgyz Republic "On Official Statistics"** Article 19. Census 2. The census, depending on its methodology and type, is conducted with documentary confirmation (agricultural census) or without documentary confirmation.

# Solution

Автоматизированная информационная система  
**САНАРИП АЙМАК**

Sanarip  
aymak

автоматизация бизнес-процесса органов местного самоуправления по формированию книги (паспорта) аймака с описанием кратких сведений об айыльном аймаке

- The main objectives of creating the system are:
- Automation of the process of generating the economic book and the village council's passport using new technologies.
  - Accounting and control of internal migration of the population.
  - Streamlining business processes and ensuring the generation of up-to-date data.
  - Integration with departmental information systems through the E-Government Interoperability Framework (SMEV) "Tunduk."
  - Automatic generation of statistics and reports for monitoring and analysis of the provided public services.
