TRADELENS OVERVIEW

+ United Nations ESCAP
Aug 2021
TradeLens is a blockchain-based container shipping platform giving the supply chain ecosystem unprecedented access to logistics data and trade documents, enabling digital collaboration across parties in the supply chain, and ushering in a digital transformation in global trade.

By reducing the friction inherent in today’s global supply chains, TradeLens enables all participants to increase visibility, improve operational efficiencies, make informed data-driven decisions, coordinate activities with their partners, react to issues in real time, and provide better customer service.

$18+ TRILLION IN GOODS
Are shipped across international borders each year

+80% OF THE GOODS
Consumers use daily are carried by the ocean shipping industry

GLOBAL TRADE INCREASE OF 15%
If barriers within the international supply chain were reduced

The WTO found digital technologies will have a profound impact on global trade, adding up to 34% to trade growth by 2030*

THE TRADELENS SOLUTION

ECOSYSTEM

The foundation of TradeLens is its business network — shippers, freight forwarders, ports and terminals, ocean carriers, intermodal operators, government authorities, customs brokers and more. Each entity shares information that can be tracked, stored and actioned across the platform throughout a shipment’s journey.

PLATFORM

The TradeLens Platform is accessible via an open API and brings together the ecosystem through a set of open standards based on UN/CEFACT. Powered by Hyperledger Fabric blockchain technology and IBM Cloud, the platform enables the industry to share information and collaborate securely.

MARKETPLACE

An open applications and services marketplace allows both TradeLens and third parties to publish fit-for-purpose services atop the TradeLens platform, fostering supply chain innovation and value creation.
THE TRADELENS ECOSYSTEM TODAY

AUTHORITIES
Working with authorities from 10+ countries to deliver better information sharing, less manual paperwork, and easier connections to national single window platforms

CARRIERS
Partnerships with >15 global ocean carriers representing data on 60% of global container shipping volume

INTERMODAL + RAIL
Maximizing the value of logistics firms (3PL and Intermodal) by improving collaboration via open global standards around commercial, documentary, and operational elements

PORTS AND TERMINALS
- Coverage across 6 continents
- Data from up to 600 ports and terminals captured by existing TradeLens members
- 180+ ports and terminals directly integrated into TradeLens
THANK YOU!
