

3c – Malaysia

(c) Civil Registration & Vital Statistics

Malaysia would like to welcome and support the convening of the second Ministerial Conference, in 2020, by galvanizing the support of the Asia-Pacific statistical community. Malaysia also already established a well-functioning CRVS system to ensure efficient registration and good quality of vital statistics are produced without having censuses or survey. For your information also, Malaysia already initiates the use of ICT when data on births were transmitted directly from government hospitals to the registration offices.
