Administrative Area in Official Statistics

- ❑ Region/Administrative Area information is often used as a dimension in data collection and dissemination
- ❑ Statistics Indonesia has an administrative area standard that used in each statistical process, namely **Master File Desa (MFD)**
- ❑ MFD consist of area code and region name for every level of area

Issue

- How to integrate big data and census/survey?
- How to compare big data and census/survey result?
- Making regional information on big data follow the official statistics standard
- Are you sure want to do it manually?
