

AGENDA ITEM2 IRAN

Thank you Madam Chair.

I'd like to thank the bureau for their work on the report and proposals.

The prepared proposals could have an important role to progressively achieve the committee's two strategic goals and Iran supports them.

I'd like to raise one point about the monitoring frame.

It seems that the Monitoring framework should be designed in such a way that the created indicators for monitoring can be disaggregated by all NSO's in the region such that NSO's can be ranked by them.

This ranking may lead to more coordination and actively participation at the national level for further efforts to approve their rank and as a result more quickly achieve the committee's two strategic goals.

Thank you
