

2011/11/11 - SD

thank you Mabam chair

I'd like to thank the steering group for their work and report.

I'd like to raise some point about bussiness register.

Strengthen of the bussiness register is a part of modernization of production of statistics and plays an important role in providing the ~~some~~ statistics for SDG's:

But there are few experience in some countries about bussiness registers.

The number of conference, workshop, training course about bussiness register is low in comparison of other topics in economic statistics such as SNA 2008

there are need to increase experience sharing ~~and~~ about that. Some countries ^{have} developed their bussiness registers and their experience can be usefull for other countries.

So It is suggested that an informal expert group under steering group ^{be} formed and share their problem and experiences about bussines register and maybe prepare a guidelines based on experiences.
