Civil Registration and vital statistics

We know that the best source of vital statistics are from civil registration. The household surveys are not a long-term substitute for civil registration and vital statistics.

In Thailand, we are working among 3 organizations ^{to improve} ~~the~~ CRVS ^{in the country}.

- Ministry of interior is responsible for civil registration

- Ministry of Public Health is ^{mainly} responsible for vital ~~registration~~ statistics

- National statistics office is responsible for population and housing census and other household surveys.
