

## **Statements of Intervention on Agenda Points of CST-4 (25-27 March 2015, Bangkok)**

### **INDIA**

#### **Agenda Point: 3(f)**

India acknowledges with a sense of deep appreciation the fact that members of the advisory Body also discussed the ADB/ESCAP initiative for SDMX capacity building. It expresses its satisfaction that the platform would be tried for national accounts and BOP statistics from four participating countries. India proposes to have this platform included in the agenda for regional collaboration and tried for international trade and for dissemination of data/metadata leading to more and more metadata-driven statistics on business processes.
