

INDONESIA, Country Statement
AGENDA-ITEM NO: (3F) (Modernization of
Statistics)
Speaker: SAIRI HASBALLAH

We support the modernization of NSO/NSS to have the capacity to produce statistics in line with the new emerging era and new statistics requirement of Post 2015 development agendas.

In the context of modernization, we also propose the NSS/NSO should shift the paradigm of statistics conduct from ~~mainly~~ mainly as data collector to information provider.

For this transformation, there is a need to transform the work ~~of~~ culture from traditionally inward looking to more bridging/outward looking.

It is urgently to enhance the NSO's business process, the capacity of communication and the way of presenting data to be more user friendly.

SAIRI
