5. Gender Statistics:

Central Statistics Organization with the support of UN-Women prepared and executed a comprehensive plan in relation to improve Gender Statistics. The establishment of steering and technical committees with the participation of key Ministries enabled this organization to practically implement development programs for Gender statistics. Inclusion of gender related indicators in questionnaires, establishment of Gender offices, organization of workshops and seminars and as well as dissemination of gender related topics in CSO publications are among those activities that has been done so far in this field.
