

Thank you Madam chair and Thanks to secretariat
for preparing the report.

I'd like to raise one point and that is

In the list of basic domains and indicators of the regional core set, there are some indicators in domain 5, human rights of woman and girls that though they are good indicators but they are inconsistent and incompatible with cultural and religious affairs in some countries.

So It is suggested that these indicators particularly V1, V2, and V3 are excluded from basic domains or production and dissemination of them is not mandated and be optional.
