

Pakistan Statement for Agenda item 3 (g)

Gender Statistics and gender analysis are important aspect at the start of data generation. The aim of global and regional discussion in this regard is to guide statistical organizations in the production and use of gender statistics and explain the importance of producing and analyzing statistics on gender differences. The task of the NSS is to produce gender based data that accurately reflect the situation in the country.

The advocacy and partnership building to convince statisticians for the use of gender statistics through communication strategies and dissemination platforms such as interactive databases and websites.

Pakistan is publishing a gender compendium but that is just gender disaggregated data not gender based focus data.

Looking to the core set of indicators, Pakistan would support the set for possible implementation. Committee should prioritize to focus on development of a frame work and areas of interest in gender perspective
