

Afghanistan (Item 4)

6. Agriculture and Rural Statistics:

Afghanistan has taken positive steps towards the development of agriculture statistics in the country, this organization not only collects data directly from data producers through questionnaires but also gather such information in Afghanistan Living Condition Survey (ALCS). With the support of FAO and CountrySTAT a better access has been provided to agriculture DATA users, furthermore, a workshop in relation to improve the quality of statistical data has been organized with the support of OIC.

At the current time Agriculture Survey is not possible to be conducted in Afghanistan until Population Census is being conducted in the country.
